

**GENERAC®**

**Comfort. Connection.  
And peace of mind, anytime.**

The **#1 Home Standby Generator** in the world.

**8 out of 10**  
home standby  
generators installed  
are Generac.

## **Live Life, Uninterrupted.**

### **Automatically restore power to your home during an outage.**

Power outages are more than just an inconvenience. When you're not prepared, they can disrupt your comfort, your routines – even your safety.

The reality is, the way we get power has been changing. An aging grid, more extreme weather and growing demands have made energy more expensive, yet less reliable. It's a shift that has homeowners thinking differently about how they prepare to power on when the grid can't.

When an outage strikes, a Generac Home Standby Generator automatically restores your power within seconds. No guesswork or extra effort on your part.

From powering just the essentials to your entire home, Generac offers flexible solutions designed for comfort, resiliency and energy efficiency that meet your everyday needs. So you can keep your home – and peace of mind – running strong.

# Uninterrupted **Monitoring.**

The first home standby generator with built-in cellular connectivity.

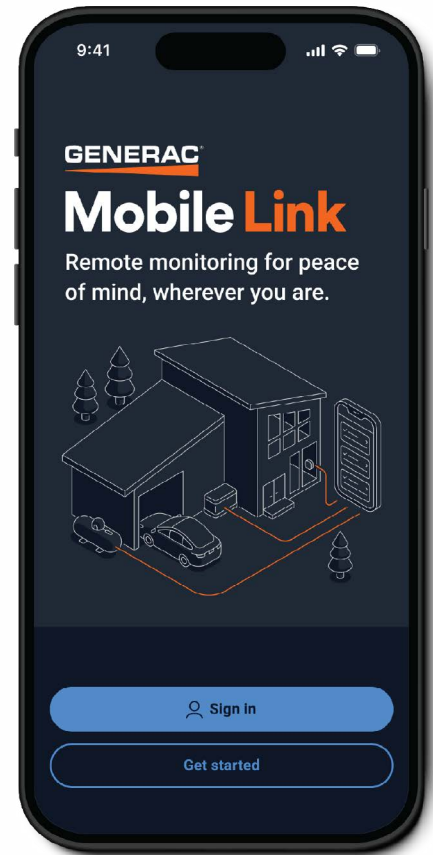

When it comes to protecting what matters most, connection means confidence. That's why we've added built-in cellular connectivity – **an industry first** – to go along with Wi-Fi in every home generator. This advanced capability offers more reliable monitoring with real-time information, anytime from anywhere.

## Mobile Link Remote Monitoring

Get clear insights to know your generator is doing exactly what it should, when it should. With the Mobile Link app, you can easily:

- Check generator status at home or on the go
- View generator exercise settings
- See real-time alerts and maintenance reminders even when Wi-Fi is down
- Check runtime, battery voltage and status history
- Review warranty and manual information

Mobile Link remote monitoring is included with every generator, so you can get connected – and stay connected – from day one.

**Multi-Carrier Cellular**  
provides connectivity even  
when Wi-Fi is down.

# Uninterrupted **Peace of Mind.**

## Reliable performance, ready when you need it.

Backup power only matters if it's ready when the lights go out. Generac Home Standby Generators are engineered for dependable performance in everyday conditions and unexpected events alike.

### Smart, efficient power use.

How a generator uses fuel matters, especially during longer outages.

With advanced Electronic Fuel and Ignition Control (EFIC), your Generac generator automatically adjusts to changing weather and environmental conditions – delivering higher fuel efficiency and lower emissions.\*

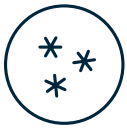

### Built for the real world.

Outages rarely arrive during ideal circumstances. Severe cold, sudden storms and harsh weather can quickly put systems to the test.

Generac generators are designed with features that support reliable operation in demanding conditions:

Oil level sensors offer continuous monitoring capabilities

Cold-start performance for readiness in lower temperatures

Design features to help reduce water, snow and ice buildup that can hamper generator output

### Fewer maintenance visits. Greater value.

Long, best-in-class service intervals mean you spend less time and money on maintenance,\*\* and more time enjoying the peace of mind that comes with a Generac whole-home generator.

\*On average versus Generac Guardian Series standby generators

\*\*Requires service every 200 hours versus 100-hour industry standard

**“We had no power for 8 days... I lost everything in my refrigerator and freezer... so we said never again. As you get older, you need that peace of mind and we just **love our Generac.**”**

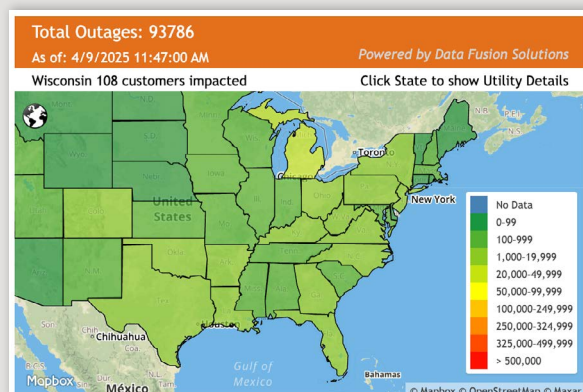

**- Linda C., East Long Meadow, MA**

# Uninterrupted Comfort.

## The widest range of whole-home generators available.

Choosing a generator isn't just about having reliable backup power – it's about having the right amount of power for the way you live.

With the widest range of standby generators on the market, we make it simple to match your home's needs and your budget – from covering a few of the essentials to supporting your entire home.

At the top of the lineup is our **28kW – the most powerful air-cooled home generator available today.** With more capacity than any other model in its class, it's capable of starting and running multiple HVAC systems, major appliances or even electric vehicle chargers at the same time.

**“Our Generac generator is what saved our belongings and is what ultimately saved us as a family. There was utter chaos and destruction outside, but my home was air conditioned and I had power.”**

- Jason C., Panama City, FL

## The Real Cost of Power Outages

Lodging costs  
per night  
**\$110**

Restock  
refrigerator  
**\$250**

Frozen pipes  
**\$10,000**

Flooded basement  
**\$26,807**

\*Hotels.com, Fema.gov "Big cost of flooding" <https://www.fema.gov/media-library/assets/doduments181549>,  
USDA: <https://www.usda.gov/>

# Uninterrupted **Control.**

## Automatic power and built-in, whole-home protection.

Generac home generators deliver the backup power you need, when you need it – but the automatic transfer switch is what makes it seamless.

When an outage is detected, our Automatic Transfer Switch:

- Signals the generator to start, automatically restoring power within seconds of an outage
- Transfers your home back to grid power when service returns
- Handles everything without any action from you

## Built-in, whole-home surge protection.

We offer the only Automatic Transfer Switch with factory-installed, whole-home surge protection.

A \$300 value\*, this Surge Protection Device (SPD) redirects excess voltage from sudden power spikes away from your home, safeguarding your appliances, sensitive electronics – even your generator – from permanent failure.

# \$15,000\*\*

## the value of susceptible electronics & appliances in the average US home.

*\*Based on average price of external surge protection device plus installation.*

*\*\*Not including cost of a home generator*

## One of a Kind

Only Generac offers a built-in, factory-direct SPD with our Automatic Transfer Switch.

## Home Generator Bundle

Pair a Generac Home Standby Generator with an Automatic Transfer Switch for whole-home backup power and surge protection in one installation.

# Uninterrupted **Versatility.**

## Everyday comfort, smarter home energy management.

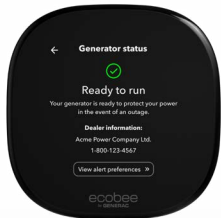

A Generac Home Standby Generator is powerful on its own. But when paired with an ecobee by Generac Smart Thermostat Enhanced, they become key components of a total home energy system.

More than temperature control, this smart thermostat helps manage home backup power use - supporting comfort, energy savings and helping ensure safer, more efficient generator starts during an outage.

### Built-in HVAC Energy Management

During an outage, ecobee can temporarily adjust HVAC startup to help protect your generator from overload and make the most of available backup power.

### Generator Status Display

Conveniently view generator status anytime from the comfort of your home, so you know your system is ready when it matters.

### Liquid Propane Monitoring

See fuel tank levels at a glance for added confidence before and during outages.

An ecobee by Generac offers proven energy savings of up to **26%\***

*\*Compared to a hold of 72°F/22°C. Your savings will vary based on several factors.*

See [www.ecobee.com/en-us/savings/](http://www.ecobee.com/en-us/savings/) for more.

## 28kW Whole-Home Bundle

This is whole-home power, protection and control, simplified for an efficient and premium energy management experience.

## Powerful Alone. Brilliant Together.

A home generator and our ecobee smart thermostat are part of a Home Energy System designed to help you generate, store, manage and monitor energy more intelligently – with flexible options to fit different homes and energy goals.

# Uninterrupted **Confidence.**

## Proven reliability. Support you can count on.

Choosing a whole-home generator comes down to trust – trusting that it will be there when you need it, and that you'll be supported long after it's installed.

For more than 65 years, Generac has helped millions of homeowners take control of their power with confidence – shaped by real outages and real-world experience.

Confidence also means knowing you're covered over time. That's why we offer an industry-leading, 5-year limited warranty on:

- Generac Whole-Home Standby Generators
- Automatic Transfer Switches with built-in surge protection
- ecobee by Generac Smart Thermostat Enhanced

**5-YEAR LIMITED  
WARRANTY**

**We back it all with  
support you  
can count on:**

-  **24/7/365  
customer service**
-  **The largest dealer  
network with over  
9,000 Authorized  
Generac Dealers**
-  **Flexible monthly  
payments available  
to help make  
backup power  
more accessible**

## Ready to Live **Life Uninterrupted?**

Be ready to power on through your everyday – even when the grid can't.

With Generac, you're not just adding backup power – you're investing in everyday comfort, connection and peace of mind. It's power that works automatically, supports the way you live and is backed by decades of home energy expertise.
